The mouse is knitted with a separate base and body and then filled and seamed. It is very easy to change the pattern to knit this seamlessly, however, if you are using the JC Rennie Miniballs then it is best to wash the fabric before you stuff it. If you do want to knit it seamlessly then pick up 96 stitches around the edge of the base rather than casting them on. Remember to stuff the mouse before grafting the head!

Assembly

Sew on the ears either side of the top of the decrease lines. The nose is a few stitches of Contrast 1 over the pointy tip. Sew beads on securely for eyes, or embroider small stitches in black yarn or felt. Stitch the tail to the top of the base. Wash the two parts of the mouse – fill a basin with warm water and a squirt of detergent. Allow to soak. Rinse out and refill with more warm water and detergent. Allow to soak again and then rinse out completely and allow to dry.

When the two parts are dry fill the head and nose with fibrefill stuffing. If you want to give your mouse a little gravitas then put a bean bag in the base.

Using whip stitch attach the body to the base, making sure the tail is at the back of the mouse not the front.
